

# ACI PRICE LIST 2019

This price list is effective from 1 January 2019 and it includes all boating services rendered by ACI marinas. Prices are quoted in HRK and include a 25% Value Added Tax.

Other services not encompassed by this price list but offered according to the marinas' abilities are charged according to internal price lists of each individual ACI marina, and they are an integral part of this price list and are available on ACI marinas reception desks.

**ACI reserves the right to change the price list without prior notice.**

## ACI MARINAS

ACI incorporates twenty-two marinas and two anchorages. Eighteen marinas are open all year round, while the remaining four marinas and two anchorages operate only during the season. The ACI marinas which operate all year round are: ACI Umag, ACI Rovinj, ACI Pula, ACI Pomer, ACI Opatija, ACI Cres, ACI Supetarska Draga, ACI Šimuni, ACI Jezera, ACI Vodice, ACI Skradin, ACI Trogir, ACI Split, ACI Milna, ACI Vrboska, ACI Korčula, ACI "Veljko Barbieri" Slano and ACI Dubrovnik.

## BERTHS

Depending on availability, ACI marinas offer the following wet berth categories: daily, monthly, semi-annual winter, semi-annual summer, nine-month (ACI marinas Rovinj and Skradin), and annual; as well as the following categories of dry berths: daily, fifteen-day (ACI Marina Dubrovnik), monthly, semi-annual (ACI marinas Umag, Pomer, Opatija, Cres, S. Draga, Jezera, Vodice, Korčula and Dubrovnik), semi-annual winter, semi-annual summer and annual.

## ELECTRICITY CONSUMPTION

### Berths without an consumption counter

Electricity consumption for standard boat purposes is included in the price of all berth categories. In ACI Marina Skradin, the use of the 32A 3P (three-phase) electricity connection and higher is paid additionally in the amount of 10% of the price of annual and nine-month wet berth.

ACI marinas Žut and Piškera have limited electricity supply. Electricity is available from 8 a.m. to 12 a.m. and from 6 p.m. to 12 p.m.

### Berths with an consumption counter

ACI marinas Rovinj and "Veljko Barbieri" Slano, which have consumption counters installed on berths, charge the use of the 32A 3P electricity connection and higher for all berth categories. The prices are indicated in the marinas' internal price lists.

ACI Marina Pomer, which has consumption counters installed on dry berths, charges the use of electricity connection through a prepaid system.

ACI Marina Dubrovnik, which has consumption counters installed on some berths, offers the option of using the electricity connection through a prepaid system.

## CONSUMPTION OF WATER

Water consumption for standard boat purposes is included in the price of all berth categories. The exceptions are ACI marinas Rovinj and "Veljko Barbieri" Slano, which have consumption counters installed, and where water is charged according to consumption.

ACI marinas Žut and Piškera have limited water supply. Water is available from 8 a.m. to 10 a.m. Consumption of water for boat washing is charged according to the other services price list, by boat length. Stopping at the marina for the purpose of filling water tanks is charged according to the internal price lists of each individual ACI marina. All ACI marinas offer water and electricity supply in accordance with their technical capabilities.

Restriction in electricity or water supplies does not constitute grounds for price change.

### PRICES

This price list contains prices for all wet berth and dry berth categories; the prices are shown in separate tables for each ACI marina, grouped according to rental periods. Prices are based on the vessel's length overall (LOA). Length overall is considered to be the total length of the vessel from the foremost part of the bow to the aftermost part of the stern, measured parallel to the waterline (including projections such as the stern platform and the bowsprit).

ACI reserves the right to verify the dimensions of the vessel by measurement and to charge the price based on the actual dimensions (length overall – LOA) obtained by measurement.
